To Whom It May Concern,

It is with great pleasure that I hereby give my strongest recommendation to Christopher Dwyer. He is a very intelligent, mature, and ambitious young man. I have no doubt he will succeed in whatever path he chooses and will accomplish great things.

I had Christopher in my CSE 343, Theory of Computation class in the Winter semester 2012. Most students find this class to be one of the hardest in their curriculum because of its abstract nature. Christopher is doing extremely well in this class and is set to get a 4.0. Christopher's perfect performance in the homework assignments and tests is only one aspect of what makes him an exceptional student. His participation in class with very pertinent questions and contributions are a sign of a very sharp mind and a keen interest in the subject. His interest went beyond what was covered in class. He also researched articles related to the class and shared them with his fellow students.

Overall, this is a student with very strong work ethics, a great intellectual potential, and a very pleasant demeanor and personality. He will excel in graduate studies or in any computing career in the industry. He has my fullest endorsement. Should you have any questions, please do not hesitate to get in touch with me.
